PROFILE

Software Technical Writer with experience creating developer- and system-focused documentation for internal products. Skilled in translating complex workflows and system behavior into clear, structured content. Experienced across the documentation lifecycle, collaborating with engineering and product teams, and using AI-assisted tools to improve documentation quality and consistency.

EXPERIENCE

OTOMASEN PVT LTD.

Technical Writer

Jan 2026 - Present

Technical Writing & Developer-Focused Content

- Updated the user manual for Glohire ATS with clearly structured workflows and step-by-step guidance for the Jobs and Candidates modules.
- Understood and documented the workflow of denial management software, XYROHealth, including its ticketing system, to support internal product demos and team enablement.
- Studied and explained the workflow of StudiesHQ, a platform connecting freelancers and hiring professionals, for presentations and demos to company CMOs.
- Created website content, landing pages, and SEO-focused blogs for Glohire ATS while also researching UI/content design ideas to support the design team.
- Wrote web content and blog articles for the XYRO Health website aligned with healthcare and denial management topics.
- Updated short-form internal product content including email templates, UI microcopy, notifications, and communication assets.
- Collaborated with developers, business analysts, and cross-functional teams to understand end-to-end product workflows and translate technical concepts into user-friendly content.

MEGAMAX SERVICES

Content Writer

Feb 2024 - Present

SEO-Friendly Content | Blog Writing | Development-Focused

- Designed, structured, and maintained technical documentation for internal HRMS and CRM products, covering workflows, feature usage, and system processes.
- Created onboarding guides, process documentation, configuration explanations, and conceptual content to support internal teams and product understanding.
- Collaborated with developers, QA teams, product managers, and designers to understand product workflows and ensure technically accurate documentation.
- Defined reusable documentation structures and maintained consistency across documentation sets following DDLC practices and Microsoft Style Guide standards.
- Managed documentation deliverables across multiple product updates while coordinating inputs from cross-functional teams.
- Conducted proofreading, content reviews, and editorial validation to maintain documentation quality, formatting consistency, and accuracy.
- Leveraged AI-assisted writing tools for faster drafting, content refinement, terminology consistency, and documentation enhancement.

Performance & Results

- Built social media marketing strategies that boosted engagement by 35% in 3 months & 80% in 18 months.
- Created multiple Meta Ad scripts for Kasturi HR, generating 80+ quality leads within 7 days, even with a new Meta Ads account.
- Boosted website traffic by 57% combined through blog writing for Megamax Solar, Megamax Aviation, and Kasturi HR.

Website & Content Management

- Revamped Megamax Solar, Megamax UK, and Megamax Services websites.
- Structured overall content and design themes, considering industry and niche.
- Coordinated with UI/UX designers, developers, and SMEs to create industry-standard company websites.

KSHITIJ BHATNAGAR

EXPERIENCE

APPSQUADZ SOFTWARE PVT LTD.

Content Writer

Aug, 2022 - Nov, 2023

SEO-Friendly Content | Blog Writing | Development-Focused

- Researched and authored technical documentation on software engineering topics including cloud platforms, web frameworks, video streaming systems, and DRM technologies.
- Produced conceptual and educational content explaining system architecture, workflows, and technical fundamentals for technical and semi-technical audiences.
- Created website content, landing pages, and SEO-focused on-page and off-page blogs for AppSquadz and its video streaming platform, VideoCrypt.
- Managed social media content calendars and contributed to social media marketing activities for technology products and platforms.
- Translated complex technical concepts into clear, structured documentation to improve understanding for developers, product teams, and stakeholders.
